CONTENTS OF VOLUME 182

No. 1. *January* 1966

PAGE

SUGGESTIONS TO AUTHORS 1

Thermal response of intravascular and rectal tissue to temperature changes and chemical conditions in the rumen of sheep. By V. E. MENDEL and G. V. RAGHAVAN 34

The effects of pressure and pharmacologically active substances on gastric peristalsis in a transmurally stimulated rat stomach-duodenum preparation. By A. K. ARMITAGE and A. C. B. DEAN 42

The release of 5-hydroxytryptamine from the rat stomach *in vitro*. By A. BENNETT, ANNE BUCKNELL and A. C. B. DEAN 57

'Unstirred layers' in frog skin. By J. DAINTY and C. R. HOUSE . 66

Further studies of the mechanism of passive sensitization. By J. L. MONGAR and D. WINNE 79

Consumption of high-energy phosphates during active sodium and potassium interchange in frog muscle. By MARIA DYDYNSKA and E. J. HARRIS 92

Some differences in uveal reactions between cats and rabbits. N. AMBACHE, L. KAVANAGH and JUDITH WHITING 110

A study of the increased sensitivity of denervated and re-innervated muscle to depolarizing drugs. By JENNIFER MACLAGAN and GERTA VRBOVÁ 131

The pattern of gastric emptying: a new view of old results. By A. HOPKINS 144

Transfer of propionate by rat small intestine *in vitro*. By R. J. C. BARRY, M. J. JACKSON and D. H. SMYTH 150

Short-latency projections to the cat cerebral cortex from skin and muscle afferents in the contralateral forelimb. By O. OSCARSSON and I. ROSÉN 164

The origin of the early receptor potential of the retina. By G. S. BRINDLEY and A. R. GARDNER-MEDWIN 185

The representation of some visceral afferents in the anterior lobe of the cerebellum. By P. P. NEWMAN and D. H. PAUL 195

Cation movements in perfused giant axons. By T. I. SHAW . . 209

Activity of neurones in the paraventricular nucleus of the hypothalamus and its control. By C. McC. BROOKS, T. ISHIKAWA, KIYOMI KOIZUMI and H.-H. LU 217

No. 2. *January* 1966

PAGE

The effect of some anticholinesterases on the response of the taenia to sympathetic nerve stimulation. By K. K. F. Ng 233

Action of choline on frog sartorius muscle. By S. Ochs 244

Membrane capacity of the cardiac Purkinje fibre. By H. A. Fozzard 255

The excitatory synaptic action of climbing fibres on the Purkinje cells of the cerebellum. By J. C. Eccles, R. Llinás and K. Sasaki . . 268

Interaction experiments on the responses evoked in Purkinje cells by climbing fibres. By J. C. Eccles, R. Llinás, K. Sasaki and P. E. Voorhoeve 297

The action of antidromic impulses on the cerebellar Purkinje cells. By J. C. Eccles, R. Llinás and K. Sasaki 316

Mechanical transmission in a Pacinian corpuscle. An analysis and a theory. By W. R. Loewenstein and R. Skalak 346

Comparison of the reflex responses elicited by stimulation of the separately perfused carotid and aortic body chemoreceptors in the dog. By M. de Burgh Daly and A. Ungar 379

A movement receptor of the small intestine. By P. Bessou and E. R. Perl 404

The presence of ergothioneine in the central nervous system and its probable identity with the cerebellar factor. By J. Crossland, J. F. Mitchell and G. N. Woodruff 427

The oxygen consumption of the placenta and foetal membranes in the sheep. By A. G. M. Campbell, G. S. Dawes, A. P. Fishman, A. I. Hyman and G. B. James 439

No. 3. *February* 1966

The relation between mechanical displacements applied to a cat's pad and the resultant impulse patterns. By D. R. G. Fuller and J. A. B. Gray 465

Intracellular autogenetic effects of muscular contraction on extensor motoneurones. The silent period. By R. Granit, J.-O. Kellerth and A. J. Szumski 484

The inhibitory innervation of the taenia of the guinea-pig caecum. By G. Burnstock, G. Campbell and M. J. Rand 504

Transmission from perivascular inhibitory nerves to the smooth muscle of the guinea-pig taenia coli. By M. R. Bennett, G. Burnstock and Mollie E. Holman 527

PAGE

Transmission from intramural inhibitory nerves to the smooth muscle of the guinea-pig taenia coli. By M. R. Bennett, G. Burnstock and Mollie E. Holman 541

Sodium–glucose interactions in the goldfish intestine. By M. W. Smith 559

Influence of temperature acclimatization on sodium–glucose interactions in the goldfish intestine. By M. W. Smith 574

Streaming potentials in the rat small intestine. By D. H. Smyth and E. M. Wright 591

Dexamethasone suppression of the plasma corticosterone response to stress in the rat. By R. A. Donald 603

A study of the interaction between motoneurones in the frog spinal cord. By A. D. Grinnell 612

The effect of acute haemorrhage in the dog and man on plasma-renin concentration. By J. J. Brown, D. L. Davies, A. F. Lever, J. I. S. Robertson and A. Verniory 649

The distribution of calcium-47 in the rat. By J. Anderson and R. W. S. Tomlinson 664

Somatic sensory cortical projection areas excited by tactile stimulation of the cat: a triple representation. By I. Darian-Smith, J. Isbister, H. Mok and T. Yokota 671

The increased extensibility of pregnant myometrium. By Brenda M. Schofield 690

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

24–25 *September* 1965

SUBJECT INDEX

Acetylcholine, paraventricular nucleus neurones response to (cat), 224
Adaptation, analysis of Pacinian corpuscle, 367
Adenosine triphosphate, ion movements in skeletal muscle and changes in (frog), 98
Adrenaline, transmurally stimulated stomach contractions affected by (rat), 49
After-discharge, Purkinje cells following excitation by climbing fibres showing (cat), 308
Age, ^{47}Ca distribution in body affected by (rat), 665
Anaesthetics, carotid body chemoreceptor discharge rate affected by inhalation (cat), 24*P*
ventral root potentials affected by (frog), 622
Androgen, simulated high altitude effect on production in male of (mouse), 43*P*
Antibody, two-point attachment, in passive sensitization, of (guinea-pig), 79
Anticholinesterases, taenia response to sympathetic nerve stimulation affected by (guinea-pig), 233
Antidromic volley, Purkinje cell antidromic potential complex conditioned by (cat), 330
Aortic body chemoreceptors, reflex responses from separately perfused carotid body chemoreceptors and (dog), 379
Arterial blood P_{CO_2}, reflex vascular responses from aortic and carotid body chemoreceptors affected by (dog), 396
Arterial pressure, relative effects of carotid and aortic body stimulation on (dog), 386
Artificial ventilation, reflex responses from carotid and aortic body chemoreceptors affected by (dog), 388
Auditory cortex, units responsive to complex tonal stimuli in (cat), 39*P*
Authors, suggestions to, 1

Basket cells, inhibition of Purkinje cells interaction with climbing fibre excitation (cat), 298
Bile salts, liver excretion of BSP affected by (dog), 47*P*
Blood pH, pulmonary circulation affected by (cat), 29*P*
Body temperature, chemical conditions and temperature change in rumen effect on (sheep), 34
distribution in core tissues of (monkey), 40*P*
Bone, ^{47}Ca deposition in (rat), 667
Bone marrow, protection against lethal irradiation by fractions of (guinea-pig), 7*P*
Bone marrow granulocytes, large acute haemorrhage effect on (guinea-pig), 45*P*
Brain, ions effect on choline acetyltransferase and acetylphosphatase of (rabbit) 19*P*
Bretylium, effect on taenia coli stimulation by perivascular nerves of (guinea-pig), 509
Bronchopulmonary anastomoses, presence of precapillary in adult, foetal, and new-born (mammal), 1*P*

Calcium, ventral root potentials affected by (frog), 624
^{47}Calcium, distribution in body (rat), 664
Carotid body chemoreceptors, inhalation anaesthetics effect on discharge rate of (cat), 24*P*
reflex responses from separately perfused aortic body chemoreceptors and (dog), 379
Castration, sex difference in PAH uptake and O_2 consumption of kidney cortex slices affected by (rat), 28*P*
Central nervous system, ergothioneine in (mammal), 430
Cerebellum, antidromic impulses action on Purkinje cells in (cat), 316
ergothioneine in (mammal), 430
excitatory synaptic action of climbing fibres on Purkinje cells in (cat), 268
interaction of stimuli on Purkinje cells in (cat), 297
representation of visceral afferents in anterior lobe of (cat), 195
Cerebral cortex, short-latency projections from skin and muscle afferents to (cat), 164
Choline, skeletal muscle membrane potential affected by (frog), 244
Cholinergic blocking agents, ventral root potentials affected by (frog), 619

Cholinomimetic drugs, ventral root potentials affected by (frog), 621
Chorionic membrane, O_2 supply to (sheep), 451
Climbing fibres, excitatory synaptic action on cerebellar Purkinje cells of (cat), 268
interaction of inhibitory influences on Purkinje cells with excitation by (cat), 297
Collagen fibres, intracellular (snail), 3*P*
Colon, metabolism involved in mono-electrolyte transport in (rat), 31*P*
Conduction velocity, fibre diameter in mesenteric nerve afferents relation to (cat), 420
Creatine phosphate, ion movements in skeletal muscle and changes in (frog), 98
Cutaneous nerves, projections in dorsal funiculus and spinocervical tract to cerebral cortex from (cat), 164
Cutaneous stimulation, triple representation in sensory cortex of (cat), 671
Cyclic-3′, 5′-adenosine monophosphate, ovarian progestational steroid synthesis stimulation *in vitro* by (rabbit), 16*P*

Deafferented cerebellum, Purkinje cell response to juxta-fastigial stimulation in (cat), 319
Decamethonium, sensitivity of re-innervated muscle to (cat), 134
Denervated muscle, hypersensitivity to depolarizing drugs on re-innervation of (cat), 131
Dexamethasone, suppression of plasma corticosterone response to stress by (rat), 603
Dihydro-β-erythroidine, ventral root potentials affected by (frog), 619
Dorsal funiculus, cutaneous and muscle afferent projections to sensory cortex in (cat), 164
Dorsal root potential, temperature effect on (frog), 615
Dynamic displacement, analysis of mechano-receptor, 360

Early receptor potential, origin in retina of (frog), 185
Ergothioneine, identity of cerebellar factor with (mammal), 427
Eserine, transmurally stimulated stomach contractions affected by (rat), 48
Excitatory post-synaptic potential, Purkinje cell polarization effect on climbing fibre impulses generation of (cat), 287
Exercise, plasma growth hormone level affected by long-continued (man), 26*P*
Extensor motoneurones, muscular contraction and silent period in discharge from (cat), 485
Eye, iris reactions of cat and rabbit enucleated, 114

Face, cortical distribution of evoked potentials from tactile stimulation of (cat), 674
Facilitation, ventral root potentials showing (frog), 638
Fastigial nucleus, stimulation of climbing fibres to cerebellum in region of (cat), 280
Fatty acids glycerides, intracellular hydrolysis in small intestine of (rat), 31*P*
Ferritin-labelled antibody, *bis*-diazotized benzidine use in production for electron microscopy of, 12*P*
Fluid transfer, mannitol effect on intestinal (rat), 594
Foetal membranes, O_2 consumption of (sheep), 439
Footpad, relation between impulse patterns and mechanical displacements applied to (cat), 465
Forearm, muscle contraction relation to blood flow in (man), 27*P*

Galactose, propionate transfer by small intestine affected by (rat), 157
Gall-bladder stimulation, cerebellar activity following (cat), 197
Ganglion-blocking drugs, taenia coli stimulation affected by (guinea-pig), 513
Gastric emptying, new view of old results (man), 144
Giant axon, cation movements in perfused (*Loligo forbesi*), 209
γ-globulin, inhibition of passive sensitization by (guinea-pig), 85
Glucose, intestinal transmural potentials after temperature acclimatization affected by (goldfish), 584
propionate transfer by small intestine affected by (rat), 157
transmural potentials relation to intestinal transfer of (goldfish), 562
Guanethidine, effect on taenia coli stimulation by perivascular nerves of (guinea-pig), 509

Haemorrhage, bone marrow granulocytes affected by large acute (guinea-pig), 45*P*
plasma-renin affected by acute (man, dog), 649

High altitude, androgen production in male affected by simulated (mouse), 43*P*
Histidine, inhibition of small intestine absorption of D-glucose by (hamster), 52*P*
Hydroxytryptamine, stomach release *in vitro* of (rat), 57
transmurally stimulated stomach contractions affected by (rat), 49
Hyoscine, transmurally stimulated stomach contractions affected by (rat), 48
Hyperpolarization, muscle tension and extension effect on motoneurone (cat), 491
Hypothalamus, activity and control of paraventricular nucleus neurones in (cat), 217

Inferior dental nerve, sensory cortex projection areas of (cat), 674
Infra-orbital nerve, sensory cortex projection areas of (cat), 674
Inhibition, of Purkinje cell rhythmic responses by antidromic impulses (cat), 334
Inhibitory junction potential, characteristics in taenia coli of (guinea-pig), 545
Intestinal distension, mechanoreceptor discharge in relation to (cat), 418
Intestinal movement, mechanoreceptor discharge in relation to (cat), 410
Intestine, electrokinetic phenomena in (rat), 591
sodium–glucose interactions in (goldfish), 559
temperature acclimatization effect on sodium–glucose interactions in (goldfish), 574
Intragastric pressure, 5-HT release *in vitro* affected by (rat), 59
Intra-hepatic circulation, investigation by indicator dilution technique of (dog), 50*P*
Intramural inhibitory nerves, transmission to plain muscle of taenia coli from (guinea-pig), 541
Intraocular pressure, species difference in relation of irritation-miosis to (cat, rabbit), 124
Intravascular temperature, response to temperature changes and chemical conditions in rumen of (sheep), 34
Ionic concentration, early receptor potential of retina affected by (frog), 186
Irins, cat iris containing, 116
Iris, different reactions in cat and rabbit of, 110
Irritation-miosis, species difference in rate of development of (cat, rabbit), 119

Juxta-fastigial stimulation, Purkinje cell response to (cat), 319

Kidney, castration effect on sex difference in PAH uptake and O_2 consumption of cortex slices of (rat), 28*P*
Kurloff bodies, X-rays and radiomimetic substances effect on (guinea-pig), 1*P*

Lactate, ion movements in skeletal muscle and changes in (frog), 98
Lipid, uptake by peritoneal cells of (mouse), 11*P*
Liver, choleresis effect on PSP excretion by (dog), 47*P*
Liver glycogen, electron microscopy and chemical estimation correlation (rat), 5*P*
Local anaesthetics, taenia coli stimulation affected by (guinea-pig), 514
Lung, passive sensitization of chopped (guinea-pig), 79
Lung denervation, reflex responses from carotid and aortic body chemoreceptors affected by (dog), 393
Lung-inflation vasodilator reflex, reflex responses from carotid and aortic body chemoreceptors affected by exclusion of (dog), 390

Magnesium, ventral root potentials affected by (frog), 624
Mannitol, intestinal transmural potential affected by (rat), 592
Mechanoreceptors, analysis and theory of transmission in, 346
location in small intestine of (cat), 409
relation between impulse patterns and displacement in foot pad of (cat), 465
Membrane capacitance, Purkinje fibre, 255
Mesenteric lymphatics, water absorption by (rat), 33*P*
Mesenteric nerve, background activity of afferent fibres in (cat), 407
Milk-ejection reflex, paraventricular nucleus neurones activity during (cat), 226
Miosis, species difference in atropine-resistant (cat, rabbit), 119
Monkey, distribution of core temperature in, 40*P*
Motoneurone, post-synaptic inhibition and silent period of (cat), 485
Muscle end-plate, choline effect on (frog), 250
Muscular contraction, intracellular autogenetic effects on extensor motoneurones of (cat), 485

Myometrium, pregnancy effect on extensibility of (rabbit), 690

Nerve impulse patterns, comparison of calculated and experimental results on foot pad (cat), 474
relation between mechanical displacement of foot pad and (cat), 465
New-born, muscle end-plates sensitivity to depolarizing drugs in (kitten), 139
Nicotine, caecal wall stimulation affected by (guinea-pig), 516
Noradrenaline, accumulation in sympathetic nerves proximal to site of constriction (cat, guinea-pig), 44*P*
depletion in spleen by nerve stimulation (cat), 42*P*
taenia coli affected by (guinea-pig), 507

Occlusion, ventral root potentials showing (frog), 638
Oestrogen, extensibility of myometrium affected by (rabbit), 692
Off-response, analysis of Pacinian corpuscle, 371
Oligomycin, phosphate changes with ion movements in skeletal muscle affected by (frog), 99
Olivary nucleus, stimulation effect on cerebellar Purkinje cells of inferior (cat), 272
Optic nerve, ergothioneine in (rabbit), 434
Oscilloscope beam switch, four-channel, 13*P*
Osmosensitive neurones, paraventricular nucleus containing (cat), 221
Ovary, cyclic-3′,5′-AMP stimulation of progestational steroid synthesis *in vitro* by (rabbit), 16*P*
Oxygen consumption, placental and foetal membranes (sheep), 439

'Pace-maker-like' activity, inhibitory nerve stimulation effect on taenia coli (guinea-pig), 531
Pacinian corpuscle, analysis and theory of mechanical transmission in, 346
Pancreatic juice, bicarbonate and chloride relationship in (cat), 49*P*
Parallel fibre volley, Purkinje cell antidromic potential complex conditioned by (cat), 325
Paraventricular nucleus, activity and control of neurones in (cat), 217
Passive sensitization, mechanism of (guinea-pig), 79
Peri-arterial nerve stimulation, transmurally stimulated stomach contractions affected by (rat), 51
Peristalsis, 5-HT release by stomach relation to (rat), 63
Peritoneal cells, lipid uptake by (mouse), 11*P*
Perivascular inhibitory nerves, transmission to plain muscle of taenia coli from (guinea-pig), 527
Perivascular nerve stimulation, atropinized taenia coli affected by (guinea-pig), 508
pH, intestine streaming potential affected by (rat), 597
propionate transfer by small intestine affected by (rat), 153
Phlorrhizin, sodium-glucose interaction in intestine affected by (goldfish), 566
Phosphates, consumption by skeletal muscle during active ion movements of high energy (frog), 92
Placenta, O_2 consumption of (sheep), 439
Plasma corticosterone, dexamethasone suppression of response to stress of (rat), 603
Plasma growth hormone, long-continued exercise effect on (man), 26*P*
Plasma non-esterified fatty acids, long-continued exercise effect on (man), 26*P*
Plasma renin, acute haemorrhage effect on (man, dog), 649
Potassium, leakage from perfused giant axon of (*Loligo forbesi*), 212
sodium extrusion from skeletal muscle relation to uptake of (frog), 95
Pregnancy, extensibility of myometrium affected by (rabbit), 690
Presynaptic blocking agents, ventral root potentials affected by (frog), 621
Progesterone, extensibility of myometrium affected by (rabbit), 692
Propionate, transfer by small intestine of (rat), 150
Pulmonary circulation, hypercapnia and blood pH effect on (cat), 29*P*
Purkinje cells, antidromic impulses action on (cat), 316
excitatory synaptic action of climbing fibres on (cat), 268
interaction of climbing fibre and other stimulation on (cat), 297
Purkinje fibres, capacitance of cardiac, 255
delayed rectification in cardiac (sheep), 36*P*

Radial nerve, sensory cortex projection areas of superficial (cat), 674
Receptor adaptation, analysis of Pacinian corpuscle, 367

Receptor units, frequency of distribution of thresholds in foot pad of (cat), 470
Rectal temperature, response to temperature change and chemical conditions in rumen of (sheep), 34
Reserpine, noradrenaline accumulation in constricted sympathetic nerves affected by (guinea-pig), 21*P*
Respiration, relative effects of carotid and aortic body stimulation on (dog), 385
Retina, origin of early receptor potential in (frog), 185
Rumen, thermal response of intravascular and rectal tissue to temperature change and chemical conditions in (sheep), 34

Sensory cortex, triple representation of tactile stimulation in (cat), 671
Sex, dexamethasone suppression of plasma corticosterone response to stress affected by (rat), 607
Silent period, extensor motoneurones and (cat), 487
Skeletal muscle, blood flow relation to contraction of (man), 27*P*
choline effect on membrane potential of (frog), 244
high energy phosphates consumption during active Na and K exchange in (frog), 92
hypersensitivity to depolarizing drugs of re-innervated (cat), 131
Skeletal muscle afferents, projections to cerebral cortex from (cat), 164
Skeletal muscle relaxation, autogenetic inhibition of motoneurone during (cat), 493
Skin, 'unstirred layers' in (frog), 66
Small intestine, galactose-dependent potential and Na concentration in (rat), 40*P*
intracellular hydrolysis of glycerides of volatile fatty acids in (rat), 31*P*
movement receptors in (cat), 404
propionate transfer by (rat), 150
streaming potentials in (rat), 591
Sodium, entry into giant axon during stimulation (*Loligo forbesi*), 213
intestinal transmural potentials affected by (goldfish), 564
intestinal transmural potentials after temperature acclimatization affected by (goldfish), 580
metabolism involved in colon transport of (rat), 31*P*
potassium uptake by skeletal muscle relation to extrusion of (frog), 95
Spinal cord, viscero-cerebellar pathways in (cat), 34*P*
Spinal motoneurones, antidromic activation of (man), 38*P*
interaction between (frog), 612
Spinocervical tract, cutaneous and muscle afferent projections to motor cortex in (cat), 164
Splanchnic nerve stimulation, cerebellar activity following (cat), 199
Spleen, noradrenaline depletion by nerve stimulation of (cat), 42*P*
Static displacement, analysis of mechanoreceptor, 359
Stellate cells, inhibition of Purkinje cells interaction with climbing fibre excitation (cat), 298
Stomach-duodenum, pressure and drugs effect on transmurally stimulated (rat), 42
Stomach, 5-HT release *in vitro* from (rat), 57
Streaming potential, intestinal fluid flow and (rat), 595
Stress, dexamethasone suppression of plasma corticosterone response to (rat), 603
Suggestions to authors, 1
Supraorbital nerve, sensory cortex projection areas of (cat), 674
Sural nerve, sensory cortex projection areas of (cat), 674
Sympathetic blocking drugs, intramural inhibitory nerve transmission in taenia coli affected by (guinea-pig), 553
perivascular inhibition of taenia coli affected by (guinea-pig), 536
Sympathetic nerves, noradrenaline accumulation proximal to site of constriction of (cat, guinea-pig), 44*P*
reserpine effect on noradrenaline accumulation in constricted (guinea-pig), 21*P*
Sympathetic nerve stimulation, anticholinesterases effect on taenia response to (guinea-pig), 233

Taenia coli, anticholinesterases effect on response to sympathetic nerve stimulation of (guinea-pig), 233
inhibitory innervation of (guinea-pig), 504
transmission from intramural inhibitory nerves to plain muscle of (guinea-pig), 541
transmission from perivascular inhibitory nerves to plain muscle of (guinea-pig), 527
Temperature, choline action on muscle end-plate affected by (frog), 246
early receptor potential of retina affected by (frog), 187

glucose-evoked potentials of intestine affected by (goldfish), 578
sodium-glucose interaction in intestine affected by (goldfish), 568
spinal motoneurones interaction affected by (frog), 615
Temperature acclimatization, intestinal sodium-glucose interactions affected by (goldfish), 574
Thyroid stimulating hormone, new *in vitro* assay of (mouse), 9*P*
Thyroid stimulator, method for quantitative estimation of long-acting (mouse), 51*P*
Tongue, cell renewal in (guinea-pig), 18*P*
Transmural potentials, temperature acclimatization effect on intestinal (goldfish), 576
Tubocurarine, ventral root potentials affected by (frog), 619

Umbilical artery, O_2 supply to placenta and foetal membranes from (sheep), 449
Uterine artery, O_2 supply to placenta and foetal membranes from (sheep), 449
Uterus, paraventricular nucleus neurones affected by distension of (cat), 226
Uveal reactions, differences between cats and rabbits in, 110

Vascular resistance, relative effects of carotid and aortic body stimulation on (dog), 386
Ventral root potential, orthodromic volley effect on (frog), 628
temperature effect on (frog), 615
Visceral afferent impulses, representation in anterior lobe of cerebellum of (cat), 195
Viscero-cerebellar projections, spinal pathways involved in (cat), 34*P*
Voltage clamp experiments, Purkinje fibres capacitance in, 261

Water, absorption into mesenteric lymphatics of (rat), 33*P*
transmural potentials relation to intestinal transfer of (goldfish), 562

D-xylose, phenobarbitone and folic acid effect on small intestine absorption of (hamster), 46*P*
